Open Platform Industrial-strength commercial NVR Machines, boasting world-class technology

Video processing requires high-performance computing equipment to support digital image recording and playback. Dotworkz NVR machines offer the perfect blend of features, high performance and data storage simplicity, with remote management flexibility and control. The servers are expandable, upgradeable, available in multiple configurations, and pre-installed with free trial video surveillance software from ONSSI, Sony, Axis and Milestone XProtect line.

NVR tier levels for all applications

NVR SMB Machines offer up to 1TB of storage in a small form factor. NVR Corporate Machines are 1U rack mountable servers with up to 4TB of storage. NVR Enterprise Machines are 2U rack mountable servers with redundant power supplies that offer up to 8TB of storage. Need more storage? We can build customize NVR Machines that will suit your needs.

3 years warranty and remote access support

For over 10 years, our in house engineers have been working with all major IP network video software (NVS) vendors to optimize performance. Each Corporate, Enterprise, and custom NVR Machine comes with a 3 year warranty. We also provide remote access support to the NVR Machines when they are connected through the internet.
